16:15 19:00 Guided tour through the historic city centre (additional activity, separate registration)
Fees

Social sustainability is a core aspect for us: Female participants will pay -15% of the congress fees, as their wages are still generally lower.

Also, public authorities, charity organisations, NPOs, students, persons performing alternative military service and military service are eligible for a **50% discount on regular fees**. The BHÖ will further grant one-person businesses a 50% reduction in fees in order to support economic growth.

Finally, we offer **group concessions**, so as to ensure that several members from the same organisation can attend the congress.

Would you believe that each and every congress attendant produces 3.5 kg of residual waste, as well as 5.5 kg of paper waste per day? It does not need to be like this!

The First European Congress on the Use, Management and Conservation of Buildings of Historical Value will be held in accordance with the provisions on the Austrian Eco-Label for Green Meetings. Already promoting a responsible and sustainable approach to the environment and our resources in our mission statement, the BHÖ seeks to walk the talk on sustainability.

„The Burghauptmannschaft Österreich ensures the sustainable conservation of Austria‘s cultural heritage.“

Green Meetings are characterised by many particularities, including the use of chlorine-free TCF paper, avoiding printing material wherever possible, and the reuse of congress material. OEBB tickets for the Austrian railways (click here to purchase special OEBB event tickets at reduced price) or special C0₂ compensation flight tickets will turn your trip into a low-emission journey. In Vienna, you can easily do without your car, as the hotels can all be reached using public transport facilities (Please, click here to order your special con-
gress ticket at the public transport services Wiener Linien). Also, the Congress Centre is a Green Venue, as it is equipped with a sound energy, electricity and waste system. The Green Catering team will provide you with dishes that are both traditional and creative. By using organic products, we do not only support the region but also your own well-being, since only natural and healthy products are being served.

We kindly invite you to...

1. Whenever possible, opt for an eco-friendly travel to Vienna by using public transport or carpool.

2. If you are unable or do not want to do without a car, or if you have to travel by plane, make up for the CO₂ emissions by paying a compensation.

We seek to set an example...

1. Organising the event, we strive to meet the criteria of the Austrian „Green Meetings“ Eco-Label.
2. Our documentation will only be printed if necessary. We encourage you to follow our example!
3. Our forms are exclusively printed on totally chlorine free (TCF) paper.
4. Our badges will be reused; the conference kits will be 100% recyclable and are meant to be reused, too. Our programme considers aspects of gender mainstreaming and diversity.
5. In our programme, we have incorporated cultural elements our region has to offer. Our objects clearly form part of this selection!
6. Conforming to all sustainability criteria, our catering considers
regional, seasonal, organic and fairly traded products.

7. Female participants will pay different congress fees to men, as their wages are still generally lower.

8. For social reasons, one-person businesses, public authorities, charity organisations and NPOs, as well as students, persons performing alternative military service and military service are eligible for a fee reduction.

9. Finally, people with disabilities can be provided with personal assistance during the congress, if such service is required.

10. Professional child care facilities are available during the time of the congress.
1st Day, 10 May 2012
The economic and educational significance of historic objects

WS I  Economic importance for cities and municipalities
Host: Dietmar Pilz / Austrian Association of Municipalities

WS II  Vivid use of historical heritage.
A site inspection in the „Cultural District Imperial Palace“ and the Austrian National Library
